- Frameworks: Laravel, Yii, Symfony, Zend Framework, React
- Others: Docker, Vagrant, Git, MySQL, PostgreSQL, Redis

## EMPLOYMENT HISTORY

### Senior Software Engineer, Drimsim

Barcelona, Spain

Sep 2018 — Present

Drimsim - universal SIM card for traveling around the world. Remote work.

Responsibilities:

- Development of the server-side for a mobile application
- Integration with about 20 partners (Stripe, Tinkoff, AWS, MailChimp, VoxImplant, Firebase, etc.)
- Development and support admin panel for technical support

Achievements:

- I discouraged the team from rewriting the backend from scratch (a huge number of development hours were saved)
- Built the process of automated testing (the number of satisfied users has been increased)
- Refactored all old and complex sections of code (the speed of release of new features in 2x was increased)

Stack:

PHP · Yii · Symfony · MySQL · Linux · Docker · OOP · Git · Amazon AWS

### Senior Software Engineer, KupiKupon Global

Moscow, Russia

Oct 2016 — Sep 2018

KupiKupon Global - one of the largest coupon sites in Russia. Remote work.

Responsibilities:

- Development and support of a self-developed service for sending emails (7 million messages a day)
- Website development and support: kupibonus, kingcoupon, zecity

Achievements:

- I became the main developer of a sophisticated email service
- A great relationship with the team and senior management
- Perfectly integrated into remote development

Stack:

PHP · Laravel · Zend Framework · Python · PostgreSQL · MySQL · Redis · Vagrant · Git · React

## **Team Leader, ALMA**

Bryansk, Russia

Jul 2015 — Oct 2016

Team leader in an outsourcing company, a team of 5 programmers

Responsibilities:

- Website development and support (Backend and Frontend)
- Team training and mentoring
- Writing documentation

Achievements:

- I built the development process
- I have implemented the practice of writing TDD
- Good code writing culture

Stack:

Development management · PHP · Parser3 · Python · JQuery · Laravel · MySQL · JavaScript

## **Web developer, ALMA**

Bryansk, Russia

Nov 2012 — Jul 2015

Developer in an outsourcing company

Responsibilities:

- Website development and support
- Modification and creation of modules for self-developed ALMA.CMS
- Parsing sites
- CRM Development

Achievements:

- I became one of the strongest developers in the team
- I motivated the team to use git, which reduced the number of conflicts
- I motivated the team to use the BEM methodology, which allowed us to create a single database of components and accelerated development
- I created a knowledge base that allowed me to reuse knowledge and code in different projects

Stack:

PHP · Parser3 · Python · JQuery · Gulp · MySQL · Wordpress · Laravel · Git

## **EDUCATION**

---

### **Engineering Specialist, Bryansk State Technical University (BSTU)**

Bryansk, Russia

Sep 2010 — Sep 2015

Automated Systems Security
